

- Skills:
- Proficiency in C#, Python, HTML & CSS, Java, SQL, PostgreSQL, Docker, Azure, AWS, Google Cloud, Django, Apache, Angular, React, MongoDB, Kubernetes, Kafka, .NET frameworks, Git
 - Team player with years of leadership experience in various work environments showing excellent flexibility and an adept learner. Particularly skilled at debugging and quickly becoming familiar with enterprise level codebase
 - Experience with Agile Product Development with Scrum and biweekly sprints using Jira, Gitlab

Work Experience:

- 8/2025-
(current)

Senior Software Engineer

Brigham Young University, Charles Draper (801) 422-7929, charles_draper@byu.edu
Design, develop, and maintain scalable software solutions that enable students, faculty, and staff to access university library systems, supporting thousands of daily users. Lead development of high-traffic applications, including *My Account*, improving performance and overall user experience. Architect and implement data synchronization workflows across multiple external APIs to ensure accurate, real-time permission management and system reliability. Mentor and manage a student software engineer, fostering technical growth and experience in high-performing team environments.
- 6/2025-
8/2025

Integration Developer

Findd, Spencer Potter (702) 408-8183, potter@findd.io
Developed and maintained custom integrations between workforce management platforms and client systems, streamlining operations and reducing manual data entry. Built scalable APIs and automation workflows to ensure accurate data sync, improving payroll accuracy and compliance. Collaborated with clients and internal teams to deliver tailored solutions that enhanced onboarding and user experience.
- 1/2025-
5/2025

Head Teacher

International Language Programs, Jared Hansen, jared@ilp.org
Led ILP's volunteer group in Nicaragua, coordinating between ILP staff and local teams to ensure a smooth program experience. Reviewed lesson plans, facilitated weekly training, supported volunteers, and managed safety and logistical needs while fostering a positive learning environment.
- 3/2024 -
1/2025

Software Engineer I

Conservice, Adam Christensen (435) 787-6158, adamchristensen@conservice.com
Redesigned existing PDF document intake pipeline that manages 1.5M documents per month and implemented a cloud-based distributed system that utilized several microservices of which I was a tech lead. Built message queues to streamline the process and integrated the legacy system (on-prem) with the newer cloud services. Played a significant role in migrating data and working with third-party and Conservice APIs.
- 5/2023 -
(current)

Budget Analyst & Software Developer (Freelance)

Moffat Company, Greg Moffat (801) 851-0606, g60moffat@gmail.com
Resolved a \$1.2M budget discrepancy through detailed review, enabling reallocation and cutting the deficit by 83%. Built a Django app for centralized budget tracking, improving accuracy and visibility. Worked closely with the General Contractor on ~\$1B in apartment, commercial, and retail projects.
- 1/2023-
3/2024

Associate Software Engineer

Conservice, Adam Christensen (435) 787-6158, adamchristensen@conservice.com
Enhanced company efficiency by leading microservice development: Built a machine learning service to predict bill availability, improving punctuality and reducing server costs. Automated data collection with 1,500+ scrapers, cutting manual acquisition expenses.

Education:

- 8/2021-
12/2024

Bachelor of Computer Science - Utah State University

Relevant Courses: Data Structures and Algorithms, Advanced Algorithms, Machine Learning, Web Development and GUIs, OS and Concurrency, Software Development, Cloud Computing (AWS)

Projects:

- contractt.it — 2023 - current

Developed a web application for Moffat Company, a General Contractor, using Django, Python, Vue.js, HTML, and CSS. This solution streamlined their operations by enabling the creation and secure storage of PDF documents for progress tracking, contract generation, and notice management, replacing manual and Excel-based methods and taking a fraction of the time.
- Utah 4-H State Ambassador — 2018-2019

My team and I conducted four youth leadership camps for all the 4-H members in the state of Utah, asked for donations from donors, and participated in national correspondence with 4-H leaders from other states.

Community Involvement/Leadership:

- 24-month full-time non-profit religious mission in Washington DC 2019-2021
- Head Teacher for International Language Programs in Granada, Nicaragua 1/2025-5/2025
- Mentored and managed a student employee at BYU HBLL
- Tech lead for Expected Bills Service and ProCor Email Importer Services at Conservice
- Utah 4-H State Ambassador & Collegiate 4-H Officer
- 100+ volunteer hours at the local Food and Care Coalition and 100+ volunteer hours at Jug Bay Nature Sanctuary
